

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · Seattle, WA (US) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying scalable backend services and microservices. Expertise in full software lifecycle ownership, operational excellence, and developing robust, data-intensive systems. Passionate about modernizing architectures, developer toolchains, and clean, testable code.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML/CSS

Technologies & Frameworks: Docker, Kubernetes, Git, GitOps, PostgreSQL, Jinja2, WeasyPrint, pytest

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented Python-based event-driven microservices, optimizing data processing for 10M+ daily events, contributing to scalable backend services.
- Standardized containerized deployments using Docker, Kubernetes, and GitOps workflows, enhancing reliability and accelerating deployment through automation.
- Mentored 6 junior/mid-level engineers, leading technical design reviews and establishing robust coding standards and comprehensive testing practices.
- Developed custom internal toolchains that reduced CI pipeline execution times by 40%, demonstrating commitment to developer efficiency and operational excellence.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust REST APIs in Python/Django and TypeScript/Node.js, contributing to full-stack experiences and backend service development.
- Integrated third-party APIs and automated webhook processors, ensuring seamless external platform connectivity and reliable data exchange.
- Implemented a comprehensive suite of unit and integration tests, raising coverage from 60% to 92%, promoting clean, testable, and production-ready code.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobsby scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
