

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · Seattle, WA (US) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying high-performance, scalable distributed systems and microservices. Expertise in cloud-agnostic infrastructure orchestration, GitOps, and optimizing system efficiency for large-scale operations.

SKILLS

Languages:	Python, TypeScript, JavaScript, SQL
Cloud & Distributed Systems:	Docker, Kubernetes, Git, GitOps, Distributed Systems, Cloud Platforms (AWS/GCP/Azure), Performance Optimization, Request Routing & Load Balancing
Databases & Tools:	PostgreSQL, pytest, Nix

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

- Led architecture and development of high-performance, distributed microservices and GitOps-driven infrastructure pipelines, focusing on maximizing compute efficiency.
- Designed and implemented high-throughput, Python-based event-driven microservices, processing 10M+ daily events in a distributed system.
 - Standardized containerized deployments utilizing Docker and Kubernetes, leveraging GitOps workflows for production-grade model releases.
 - Mentored 6 junior/mid-level engineers, fostering technical excellence and establishing robust code quality and testing standards.
 - Developed custom internal toolchains, optimizing CI pipeline execution times by 40% and enhancing overall compute efficiency.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

- Backend engineer focused on building scalable RESTful APIs, high-performance developer tooling, and robust automated deployment integrations for distributed systems.
- Developed robust, scalable REST APIs in Python/Django and TypeScript/Node.js for distributed applications.
 - Integrated third-party APIs and automated webhook processors, enhancing system resilience and external data traffic management.
 - Implemented a comprehensive suite of unit and integration tests, increasing code coverage from 60% to 92% and ensuring system reliability.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

- A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.
- Developed python-jobsby scraper integration and two-pass LLM fit triage
 - Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
