

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · [Seattle, WA \(US\)](#) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying scalable backend services, event-driven microservices, and GitOps-driven automation systems. Passionate about leveraging robust testing, efficient developer toolchains, and clean code to build highly reliable and impactful global financial platforms.

SKILLS

Languages:	Python, TypeScript, JavaScript, SQL, HTML/CSS
Technologies & Frameworks:	Docker, Kubernetes, Git, GitOps, PostgreSQL, Event-Driven Architectures, Microservices, System Reliability, Performance Optimization, pytest, Jinja2, WeasyPrint

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented Python-based event-driven microservices processing 10M+ daily events, ensuring high availability and reliability for critical global operations.
- Standardized containerized deployments utilizing Docker, Kubernetes, and GitOps workflows, enhancing system stability and efficiency for global service delivery.
- Mentored 6 junior/mid-level engineers, establishing local code styling and rigorous testing standards crucial for maintaining secure and robust production systems.
- Developed custom internal toolchains that reduced CI pipeline execution times by 40%, significantly accelerating feature delivery and improving developer productivity.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust REST APIs in Python/Django and TypeScript/Node.js, enabling secure and reliable data exchange for critical platform functionalities.
- Integrated third-party APIs and automated webhook processors for external developer platforms, expanding service capabilities and enhancing user experience.
- Implemented a suite of unit and integration tests raising coverage from 60% to 92%, significantly improving code quality and system integrity.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobsby scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
