

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · [Seattle, WA \(US\)](#) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience specializing in platform and infrastructure development. Proven expertise in designing, building, and deploying scalable backend services, cloud-native microservices, and GitOps-driven automation systems within AWS environments. Passionate about enhancing developer productivity, CI/CD, observability, and clean code practices.

SKILLS

- Languages:** Python, TypeScript, JavaScript, SQL, HTML/CSS
- Technologies & Frameworks:** AWS, Docker, Kubernetes, Git, GitOps, CI/CD, Infrastructure as Code, Observability, Monitoring, Distributed Systems, PostgreSQL, Backend Services, pytest

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation**

2021-03-01 – 2026-07-01

- Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.
- Designed and implemented Python-based event-driven microservices processing 10M+ daily events, contributing to scalable backend systems
 - Standardized containerized deployments utilizing Docker, Kubernetes, and GitOps workflows, enhancing CI/CD and infrastructure-as-code practices
 - Mentored 6 junior/mid-level engineers, establishing local code styling and testing standards, and fostering operational best practices
 - Developed custom internal toolchains that reduced CI pipeline execution times by 40%, significantly improving developer productivity and deployment efficiency

Software Engineer at **Hooli Inc.**

2018-06-01 – 2021-02-01

- Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.
- Developed robust REST APIs in Python/Django and TypeScript/Node.js, contributing to scalable backend and distributed systems
 - Integrated third-party APIs and automated webhook processors for external developer platforms, enhancing system integrations and reliability
 - Implemented a suite of unit and integration tests raising coverage from 60% to 92%, improving code quality and system reliability

PROJECTS

JobGitOps (Python, Nix, GitHub Actions)

2026-06-01 – 2026-07-01

- A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.
- Developed python-jobsby scraper integration and two-pass LLM fit triage
 - Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
