

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · Bellevue, WA (US) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying scalable backend services, microservices, and GitOps-driven automation for enterprise environments. Proven ability to deliver robust customer integrations and high-impact technical solutions, with a focus on full-stack development and operationalizing complex systems.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML/CSS

Technologies & Frameworks: Docker, Kubernetes, Git, GitOps, PostgreSQL, Node.js, React, pytest, Cloud Platforms, API Integration

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented high-throughput, Python-based event-driven microservices for scalable enterprise operations, processing 10M+ daily events.
- Standardized secure, containerized deployments leveraging Docker, Kubernetes, and GitOps workflows to enhance operational stability in complex environments.
- Mentored 6 junior/mid-level engineers, fostering strong technical practices and communication critical for collaborative development and customer-facing projects.
- Developed custom internal toolchains and automation workflows, reducing CI pipeline execution times by 40% and enhancing developer productivity.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust, scalable REST APIs using Python/Django and TypeScript/Node.js, supporting full-stack application requirements.
- Successfully integrated third-party APIs and automated webhook processors, building critical connections for external developer platforms and enterprise systems.
- Significantly enhanced system reliability by implementing comprehensive unit and integration tests, raising coverage from 60% to 92%.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobsby scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
