

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · Seattle, WA (US) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying scalable backend services and cloud applications, with expertise in microservices architecture, GitOps-driven automation, and AI-enabled solutions. Passionate about well-tested, maintainable code, developer toolchains, and solving complex problems in high-volume data environments.

SKILLS

Languages: Python, TypeScript, JavaScript, Node.js, SQL, HTML/CSS

Technologies & Frameworks: Docker, Kubernetes, Git, GitOps, CI/CD, PostgreSQL, AWS, AI/ML, Jinja2, WeasyPrint, pytest

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

- Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.
- Designed and implemented Python-based event-driven microservices processing 10M+ daily events, delivering highly scalable solutions for complex, high-volume data processing environments.
 - Standardized containerized deployments utilizing Docker, Kubernetes, and GitOps workflows, enhancing cloud infrastructure reliability and CI/CD efficiency.
 - Mentored 6 junior/mid-level engineers, establishing local code styling and robust testing standards to ensure high code quality and maintainability.
 - Developed custom internal toolchains that reduced CI pipeline execution times by 40%, optimizing developer productivity and accelerating deployment cycles.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

- Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.
- Developed robust REST APIs in Python/Django and TypeScript/Node.js, supporting scalable web applications and external developer platforms.
 - Integrated third-party APIs and automated webhook processors, streamlining complex data flows and enabling seamless external platform integrations.
 - Implemented a comprehensive suite of unit and integration tests, raising code coverage from 60% to 92% and upholding high standards for code quality and reliability.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

- A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.
- Developed python-jobspy scraper integration and two-pass LLM fit triage
 - Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
