

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · Seattle, WA (US) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience in designing, building, and deploying reliable, scalable cloud-based solutions, including event-driven microservices and CI/CD-driven automation systems. Proven ability to solve complex technical problems, contribute to system architecture, and apply modern engineering practices such as automated testing and secure coding. Passionate about mentoring engineers, fostering engineering standards, and driving continuous improvement in agile team environments.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML/CSS

Technologies & Frameworks: Docker, Kubernetes, Git, GitOps, PostgreSQL, Jinja2, WeasyPrint, pytest, CI/CD, Microservices, Event-Driven Architecture, Cloud Platforms, Agile, Automated Testing

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Led the design and implementation of Python-based event-driven microservices, processing 10M+ daily events, contributing to scalable and geo-redundant system architecture.
- Standardized containerized deployments utilizing Docker, Kubernetes, and GitOps-driven CI/CD workflows, ensuring modern engineering practices and secure coding standards.
- Mentored 6 junior/mid-level engineers, establishing engineering standards for code quality, testing, and participating in code reviews.
- Developed custom internal toolchains, improving CI/CD pipeline efficiency and reducing execution times by 40%, demonstrating a focus on developer productivity and automation.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust RESTful services and APIs in Python/Django and TypeScript/Node.js, contributing to API-driven and service-based architectures.
- Integrated third-party APIs and automated webhook processors, enhancing system capabilities and external developer platforms.
- Implemented a comprehensive suite of unit and integration tests, raising code coverage from 60% to 92%, demonstrating adherence to quality standards and modern development practices.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobspy scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
