

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · [Seattle, WA \(US\)](#) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying scalable backend services, microservices, and GitOps-driven automation systems. Proven technical leadership in architecting robust, fault-tolerant solutions for global scale and complex third-party integrations, with a strong product mentality and passion for optimizing operational efficiency.

SKILLS

Technologies & Frameworks: Docker, Kubernetes, Git, GitOps, PostgreSQL, pytest, System Architecture, Microservices, API Integration, Automation, Fault-Tolerant Systems, Data Integrity, Supply Chain Logistics, Jinja2, WeasyPrint

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented Python-based event-driven microservices, architecting for high-throughput and global scalability (10M+ daily events) within an operations-first environment.
- Standardized containerized deployments utilizing Docker, Kubernetes, and GitOps workflows, enhancing system reliability and automation for critical operational infrastructure.
- Provided technical leadership and mentorship to 6 junior/mid-level engineers, fostering robust, fault-tolerant system design and code quality.
- Developed custom internal toolchains that reduced CI pipeline execution times by 40%, significantly optimizing development and deployment cycles for complex integrated systems.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust REST APIs in Python/Django and TypeScript/Node.js, focusing on backend scalability and data integrity for critical business functions.
- Integrated numerous third-party APIs and automated webhook processors for external platforms, building resilient systems to manage complex data flows and discrepancies.
- Implemented a comprehensive suite of unit and integration tests, raising coverage from 60% to 92%, ensuring system reliability and accuracy for integrated services.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobsapy scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
