

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · [Seattle, WA \(US\)](#) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying scalable backend services, event-driven microservices, and GitOps automation systems. Proven track record in developing advanced developer toolchains and complex analysis solutions that optimize system performance and enable robust workflows for critical data systems. Passionate about fostering cross-functional collaboration and delivering impactful software.

SKILLS

- Languages:** Python, C++, TypeScript, JavaScript, SQL, HTML/CSS
- Technologies & Frameworks:** Docker, Kubernetes, Git, GitOps, PostgreSQL, Pandas, pytest, Jinja2, WeasyPrint
- Concepts & Methodologies:** Data Processing, Performance Optimization, Distributed Systems, Microservices, CI/CD

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented Python-based event-driven microservices, processing 10M+ daily events, contributing to complex analysis solutions for high-throughput data systems.
- Standardized containerized deployments utilizing Docker, Kubernetes, and GitOps workflows, enhancing developer efficiency and system reliability.
- Mentored 6 junior/mid-level engineers, fostering a collaborative environment and establishing robust code styling and testing standards to ensure high-quality software delivery.
- Developed custom internal toolchains and advanced analysis solutions that reduced CI pipeline execution times by 40%, significantly optimizing developer workflows and system efficiency.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust REST APIs in Python/Django and TypeScript/Node.js, facilitating data integration for diverse applications.
- Integrated third-party APIs and automated webhook processors, enhancing interoperability for external developer platforms and tools.
- Implemented a comprehensive suite of unit and integration tests, raising coverage from 60% to 92%, ensuring high software quality and reliability for critical systems.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobsapy scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
