

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · [Seattle, WA \(US\)](#) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying scalable, event-driven backend systems and microservices. Proven ability to architect personalized customer experiences, integrate AI/ML models, and drive operational excellence through GitOps-driven automation. Passionate about technical leadership, developer toolchains, and delivering high-quality, impactful solutions.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML/CSS

Technologies & Frameworks: Docker, Kubernetes, Git, GitOps, PostgreSQL, AI/ML Integration, Event-Driven Architecture, Personalization Systems, Microservices, System Design, Jinja2, WeasyPrint, pytest

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented Python-based high-throughput event-driven microservices processing 10M+ daily events, enabling real-time personalization and dynamic customer experiences.
- Standardized containerized deployments utilizing Docker, Kubernetes, and GitOps workflows, ensuring scalable and reliable infrastructure for critical services.
- Mentored 6 junior/mid-level engineers, fostering technical growth and setting high engineering standards for code quality and testing.
- Developed custom internal toolchains that reduced CI pipeline execution times by 40%, improving developer velocity and operational efficiency.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust REST APIs in Python/Django and TypeScript/Node.js, powering key backend functionalities for user-facing applications.
- Integrated third-party APIs and automated webhook processors for external developer platforms, facilitating ingestion of diverse data signals.
- Implemented a suite of unit and integration tests raising coverage from 60% to 92%, significantly improving system reliability and code quality.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobsby scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
