

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · [Seattle, WA \(US\)](#) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying highly performant, reliable, and scalable backend services and microservices. Expert in architectural design, automated testing, and fostering high-quality, maintainable code within cross-functional teams.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML/CSS

Technologies & Frameworks: Docker, Kubernetes, Git, GitOps, PostgreSQL, System Design, API Design, Scalability, Performance Optimization, pytest, Mentorship

WORK EXPERIENCE

Senior Software Engineer at [Initech Corporation](#) 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented highly performant and reliable Python-based event-driven microservices, processing 10M+ daily events with a focus on scalability and system integrity.
- Standardized containerized deployments leveraging Docker, Kubernetes, and GitOps workflows to ensure consistent, reliable, and efficient delivery of software.
- Mentored 6 junior/mid-level engineers, setting high technical standards, fostering clean code practices, and enhancing overall team capabilities.
- Developed custom internal toolchains, enhancing developer efficiency and reducing CI pipeline execution times by 40%.

Software Engineer at [Hooli Inc.](#) 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust and scalable REST APIs in Python/Django and TypeScript/Node.js, ensuring high availability and secure data access.
- Integrated third-party APIs and engineered automated webhook processors, facilitating seamless external developer interactions and data exchange.
- Implemented a comprehensive suite of automated unit and integration tests, significantly raising coverage from 60% to 92% and improving overall system reliability.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobsby scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
