

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · Seattle, WA (US) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying scalable backend services, event-driven microservices, and GitOps-driven infrastructure. Proven ability to deliver robust, high-throughput solutions for critical systems and enhance developer productivity through advanced toolchains and rigorous testing. Eager to contribute to high-impact financial products at a global scale.

SKILLS

Languages:	Python, TypeScript, JavaScript, SQL
Technologies & Frameworks:	Docker, Kubernetes, Git, GitOps, PostgreSQL, pytest, Cloud Platforms, Distributed Systems, API Design, Microservices Architecture, CI/CD Automation, AI/ML Concepts, Security Best Practices

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented Python-based event-driven microservices, handling 10M+ daily events with a focus on low-latency transactions and data integrity for critical systems
- Standardized containerized deployments utilizing Docker, Kubernetes, and GitOps workflows, enhancing system reliability and security for high-growth infrastructure
- Mentored 6 junior/mid-level engineers, fostering a culture of technical excellence and establishing rigorous code styling and testing standards to ensure robust product quality
- Developed custom internal toolchains that reduced CI pipeline execution times by 40%, significantly improving developer productivity and accelerating feature delivery for cross-functional teams

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust, high-performance REST APIs in Python/Django and TypeScript/Node.js to support evolving user needs and external integrations
- Integrated third-party APIs and automated webhook processors, ensuring seamless and secure data exchange for external developer platforms
- Implemented a comprehensive suite of unit and integration tests, raising coverage from 60% to 92% and improving overall system stability and reliability

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobsby scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
