

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · [Seattle, WA \(US\)](#) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience in the architecture, design, and delivery of scalable full-stack applications and cloud-native services. A hands-on technical leader skilled in solving complex software challenges, optimizing CI/CD pipelines, and mentoring engineering teams to deliver high-quality, maintainable solutions across multi-language environments.

SKILLS

Languages:	Python, TypeScript, JavaScript, SQL, HTML/CSS
Technologies & Frameworks:	Docker, Kubernetes, Git, GitOps, PostgreSQL, RESTful APIs, Microservices, Event-Driven Architectures, CI/CD, System Design, AI/ML Concepts, Jinja2, WeasyPrint, pytest

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

- Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.
- Led the architecture, design, and implementation of Python-based event-driven microservices, processing 10M+ daily events for high-throughput applications.
 - Standardized cloud-native deployments leveraging Docker, Kubernetes, and GitOps workflows, enhancing CI/CD pipelines and operational resilience.
 - Mentored 6 junior/mid-level engineers, establishing and upholding engineering best practices, code quality, and testing standards.
 - Developed custom internal toolchains and optimized CI/CD pipelines, reducing execution times by 40% and improving overall deployment efficiency.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

- Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.
- Designed and built robust, secure, and scalable RESTful APIs using Python/Django and TypeScript/Node.js, contributing to modern web application backends.
 - Integrated complex third-party APIs and developed automated webhook processors, enhancing system capabilities and external platform interactions.
 - Implemented and championed a comprehensive suite of unit and integration tests, elevating code coverage from 60% to 92% and improving overall software reliability.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

- A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.
- Developed python-jobspy scraper integration and two-pass LLM fit triage
 - Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
