

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · Seattle, WA (US) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying scalable backend services and developer tooling, including GitOps-driven automation systems. Possesses end-to-end feature ownership and a passion for robust testing, efficient developer toolchains, and clean code.

SKILLS

Technologies & Frameworks: Docker, Kubernetes, Git, GitOps, CI/CD, PostgreSQL, pytest

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented high-throughput Python-based event-driven microservices, processing 10M+ daily events, ensuring scalability and performance for critical systems.
- Standardized containerized deployments utilizing Docker, Kubernetes, and GitOps workflows, enhancing deployment velocity and operational reliability across the software development lifecycle.
- Mentored 6 junior/mid-level engineers, establishing coding standards, testing best practices, and fostering a culture of knowledge sharing and collaborative development.
- Developed custom internal developer toolchains and automation that reduced CI pipeline execution times by 40%, directly impacting developer velocity and efficiency.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust REST APIs primarily in Python/Django and TypeScript/Node.js, ensuring high reliability and maintainability for backend services.
- Integrated third-party APIs and automated webhook processors, enhancing platform extensibility and supporting external developer ecosystems.
- Implemented a comprehensive suite of unit and integration tests, raising code coverage from 60% to 92% and improving overall software quality and operational stability.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobsapy scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington** 2014-09-01 – 2018-06-01

GPA: 3.8
