

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · Seattle, WA (US) · mbirkenbaum@GitHub

Senior Backend Engineer with 8+ years of experience designing, building, and deploying scalable financial backend services, microservices, and GitOps-driven automation systems. Passionate about optimizing performance, ensuring data accuracy, and delivering robust solutions for complex business needs.

SKILLS

- Languages:** Python, TypeScript, JavaScript, SQL, HTML/CSS
- Technologies & Frameworks:** Docker, Kubernetes, Git, GitOps, PostgreSQL, pytest, RESTful APIs, Microservices, Data Modeling, Event-Driven Architecture, Distributed Systems

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented Python-based event-driven microservices, processing 10M+ daily events, to power core product features and ensure high-volume financial data accuracy.
- Standardized containerized deployments utilizing Docker, Kubernetes, and GitOps workflows, enhancing deployment reliability and operational efficiency for critical backend systems.
- Mentored 6 junior/mid-level engineers, establishing robust code styling and testing standards crucial for maintaining high-quality, reliable backend services.
- Developed custom internal toolchains that reduced CI pipeline execution times by 40%, directly contributing to faster feature delivery and improved developer agility.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust backend REST APIs in Python/Django and TypeScript/Node.js, focusing on scalable design and optimal performance for core services.
- Integrated third-party APIs and automated webhook processors, enhancing data exchange and operational efficiency across platforms.
- Implemented a comprehensive suite of unit and integration tests, raising coverage from 60% to 92%, ensuring high reliability and accuracy for critical backend logic.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobsby scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
