

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · [Seattle, WA \(US\)](#) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience designing, building, and deploying scalable backend systems and microservices. Proven track record leading complex technical projects, driving reliable infrastructure, and enabling seamless data access within fast-paced, evolving environments. Passionate about mentorship, developer toolchains, and impactful engineering.

SKILLS

Languages: Python, TypeScript, SQL, JavaScript, HTML/CSS

Technologies & Frameworks: Docker, Kubernetes, Git, GitOps, PostgreSQL, API Integration, Distributed Systems, Scalable Architecture, pytest, Jinja2, WeasyPrint

WORK EXPERIENCE

Senior Software Engineer at **Initech Corporation** 2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented high-throughput, Python-based event-driven microservices processing 10M+ daily events, ensuring reliable data flow for critical financial infrastructure.
- Standardized containerized deployments leveraging Docker, Kubernetes, and GitOps workflows to enhance system reliability and scalability across the platform.
- Mentored 6 junior/mid-level engineers, fostering a culture of technical excellence and establishing best practices for code quality and testing.
- Developed custom internal toolchains that reduced CI pipeline execution times by 40%, significantly improving developer velocity and project delivery.

Software Engineer at **Hooli Inc.** 2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust REST APIs in Python/Django and TypeScript/Node.js to power backend systems and facilitate data exchange.
- Integrated third-party APIs and automated webhook processors, enabling critical connectivity and data synchronization with external financial and developer platforms.
- Implemented a comprehensive suite of unit and integration tests, raising coverage from 60% to 92% to ensure system reliability and data integrity.

PROJECTS

JobGitOps (Python, Nix, GitHub Actions) 2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobspy scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
