

Martin Birkenbaum

SENIOR SOFTWARE ENGINEER

martin.birkenbaum@initech.example.com · [+12065550192](tel:+12065550192) · github.com/mbirkenbaum · [Seattle, WA \(US\)](#) · mbirkenbaum@GitHub

Senior Software Engineer with 8+ years of experience in designing, building, and deploying scalable Python-based backend services, microservices, and robust GitOps-driven automation systems. Proven expertise in developing high-quality, production-grade software, focusing on code quality, automated testing, and developer toolchains to enhance system reliability and efficiency, including experience relevant to data pipelines and ML infrastructure.

SKILLS

Technologies & Frameworks: Docker, Kubernetes, Git, GitOps, PostgreSQL, pytest (automated testing & evaluation), Jinja2, WeasyPrint

WORK EXPERIENCE

Senior Software Engineer at [Initech Corporation](#)

2021-03-01 – 2026-07-01

Led architecture and development of high-throughput microservices and GitOps-driven infrastructure pipelines.

- Designed and implemented highly scalable Python-based event-driven microservices, processing 10M+ daily events, applicable to high-throughput data pipelines and backend ML infrastructure.
- Standardized containerized deployments utilizing Docker, Kubernetes, and GitOps workflows, ensuring reliable and efficient software delivery.
- Mentored 6 junior/mid-level engineers, establishing local code styling, quality, and rigorous testing standards, contributing to robust codebases and excellent team communication.
- Developed custom internal toolchains and automated verification mechanisms that reduced CI pipeline execution times by 40% and enhanced overall code quality.

Software Engineer at [Hooli Inc.](#)

2018-06-01 – 2021-02-01

Backend engineer focused on building RESTful APIs, developer tooling, and automated deployment integrations.

- Developed robust and scalable REST APIs in Python/Django and TypeScript/Node.js, forming critical backend components for full-stack applications.
- Integrated third-party APIs and designed automated webhook processors for external developer platforms, demonstrating expertise in system integration and automation.
- Implemented a comprehensive suite of unit and integration tests, raising coverage from 60% to 92%, and establishing high standards for code reliability and quality assurance.

PROJECTS

[JobGitOps](#) (Python, Nix, GitHub Actions)

2026-06-01 – 2026-07-01

A GitOps-driven job application and tracking system utilizing GitHub Issues, Projects, and Actions.

- Developed python-jobspy scraper integration and two-pass LLM fit triage
- Designed reproducible local environments via Nix and devenv

EDUCATION

Bachelor of Science in Computer Science at **University of Washington**

2014-09-01 – 2018-06-01

GPA: 3.8
